

	Job Name: Job Location: Engineer: Contractor: Tag: PO#: Rep:	
SJ-400W SJ-400L 2" - 8" 2" - 8"	Wholesale Dist.:	

The Model SJ-400-L Butterfly Valve is a grooved-end stainless steel butterfly valve designed for 300 psi service, supplied with a 10-position locking lever handle. The end-toend dimensions conform to MSS SP-67. The body is investment cast in grade CF8M (type 316) to ASTM A743 with integral neck and ISO mounting top flange. The neck height allows for insulation up to two inches. The disc is a dual-seal type, encapsulated either with Gr. E-pw EPDM for cold and hot water services or with Gr. T Nitrile for oil services. SJ-400-L Butterfly Valves with standard disc and Gr. E-pw EPDM seat are UL classified to NSF/ANSI 61 and NSF/ANSI 372.

The Model SJ-400-W Butterfly Valve is a grooved-end stainless steel butterfly valve designed for 300 psi service, supplied with a worm gear operator. The ISO5211 mounting pad allows for the mounting of power actuators. The end-to-end dimensions conform to MSS SP-67. The body is available in grade CF8M (type 316) to ASTM A743 with integral neck and ISO mounting top flange. The disc is a dual-seal type, encapsulated with Gr. E EPDM for cold and hot water services.

MATERIAL SPECIFICATIONS

BODY AND END CAP:

 Gr. CF8M (Type 316) stainless steel to ASTM A743 or A351 or A744 which is UL classified in accordance with NSF/ANSI 61 and NSF/ANSI 372 for potable water use to temperature 180°F (82°C).

STEM:

• Stainless steel Type 410 to ASTM A582.

DISC:

• Gr. CF8M (Type 316) encapsulated with Gr. E-pw EPDM.

GENERAL NOTES

- Maximum Working Pressure (CWP) listed is the maximum cold water pressure for general piping services tested to ASTM F1476 and or AWWA C606
 methods. Figures listed are based on roll- or cut-grooved standard wall carbon steel pipe. For other pipe schedules or pipe materials, contact Shurjoint
 for additional information.
- Max. End Load is calculated based on the maximum working pressure (CWP).
- Field Joint Test: For one time only the system may be tested hydrostatically at 1.5 times the maximum working pressure listed (AWWA C606 5.2.3).
- Warning: Piping systems must always be depressurized and drained before attempting disassembly and or removal of any components.
- The 10 Year Limited Warranty applies to manufacturing defects only and does not cover severe service/temperature applications or wear parts.
- · Shurjoint reserves the right to change specifications, designs and or standard without notice and without incurring any obligations.
